KENNY DAEL C. ASAN

SOFTWARE ENGINEER | FULL-STACK & MOBILE DEVELOPER

Taguig City, Philippines | +63 976 629 5376 | kennydael213@gmail.com

GitHub: github.com/LeeSinHanma | LinkedIn | RideOut on Google Play

PROFESSIONAL SUMMARY

Software engineering and computer science student with hands-on experience independently building and publishing an Android application, deploying and maintaining Node.js backend services, and developing full-stack web and desktop systems. Skilled in Flutter, React, Python, JavaScript, Firebase, REST APIs, and computer vision. Led technical planning and feature scope for a driver-fatigue detection thesis system; able to communicate complex technical concepts to nontechnical audiences. Expected to graduate July 2027.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C#, C++, Lua, Visual Basic

Frontend & Mobile: Flutter, React, Ionic, Progressive Web Apps (PWA), HTML, CSS, Tkinter, React Three Fiber, Drei, UI/UX design

Backend & Data: Node.js, FastAPI, Firebase Realtime Database, Cloud Firestore, OAuth, REST APIs, data integration

AI, Vision & Hardware: MediaPipe, Random Forest, model training, dataset preparation, computer vision, ESP32, Arduino

Tools & Deployment: Git, GitHub, Linux, DigitalOcean, PM2, Vercel, Google Cloud, Google Maps API, Google Play Console, CI/CD concepts

SELECTED TECHNICAL PROJECTS

RideOut - Android Navigation & Group Tracking App | Sole Developer | 2026 | Published on Google Play

- Designed, built, and released an Android app using Flutter with a Node.js backend, Firebase Realtime Database and Cloud Firestore.
- Implemented real-time group location tracking, synchronized routing, proximity alerts, route recalculation, Google Maps API integration, and OAuth authentication.
- Deployed and maintained backend services on DigitalOcean using Linux and PM2; gained practical experience with Play Store release workflows and familiarity with app privacy policy and terms-of-use requirements.

SentryDrive - Driver Fatigue Monitoring Platform | Technical Planning Lead & Sole Website Developer | 2026 | Thesis Project

- Owned technical feasibility assessment, feature prioritization, scope decisions, and presentation of an ESP32 camera-to-Android-to-web fatigue monitoring system.
- Independently developed a React and Firebase web dashboard using Realtime Database and Firestore to display driver yawning and eye-closure events across vehicle fleets.
- Created a MediaPipe/Tkinter head-controlled driving game for system demonstrations, using eye-closure detection to trigger interactive hazards.

Signify - Dactylology Recognition System | Full-Stack & Machine Learning Developer | 2025 | Academic Project

- Built Python/Tkinter interface and FastAPI backend for a computer-vision sign-language letter recognition prototype.
- Prepared and cleaned datasets, used MediaPipe features, and trained a Random Forest classifier to distinguish hand-signed letters; integrated model inference with application data flow.

ADDITIONAL TECHNICAL PROJECTS

Tindahan System - Grocery Inventory Application | Sole Developer | 2026 | Open-source project in progress

- Built a cross-platform Python/Tkinter desktop system for Windows and Linux with inventory tracking, barcode scanning, grocery list creation, profit dashboard, and low-stock alerts.

Dondon's Fitness Gym - Membership & Inventory System | Frontend Developer | Academic Project

- Designed Ionic/PWA user interface, navigation, QR code generation and scanning experiences, and frontend data flows for membership and inventory workflows.

NewHikes - Interactive Landing Page | Sole Developer | Academic Demo

- Created a React landing-page prototype featuring React Three Fiber, Drei, 3D visuals, and immersive scrolling interactions; demo UI without production backend.

PROFESSIONAL EXPERIENCE

Alorica - Sales Representative (Work from Home) | Aug 2024 - Dec 2024 | Quezon City

- Processed customer orders while working toward a 90-second average handling time target; verified shipping details, handled upselling, and responded to customer inquiries.

Alorica - Captioning Agent (On-site) | Sep 2022 - Sep 2023 | Taguig City

- Produced real-time English captions for calls across different accents and contexts, including personal, business, and IVR interactions.

Foundever (Sitel) - Recruitment Specialist (Blended) | Oct 2021 - Jul 2022 | Mandaluyong City

- Conducted initial candidate interviews, maintained applicant tracking information, contacted up to 40 candidates daily, and guided candidates through recruitment steps.

EDUCATION

Taguig City University | Computer Science | Expected graduation: July 2027 | Taguig City

MCA Montessori School | ICT | March 2019 | Taguig City
